# WHY CHOOSE

US?

With more than 40 years' experience delivering embryo transfer programs, Murribrook ET & Recipient Services is one of the most established recipient providers in the industry.

By supplying and managing recipients for both MOET and IVF embryos, **we remove the workload, pressure, and risk from your operation** – backed by results driven pricing.

# ADVANTAGES WITH

US

Run an embryo transfer program with **minimal effort on your part**. We manage recipient handling, synchronisation, paddocks, and feeding – so you don't have to.

**You don't carry the cost or workload of empty recipients** – particularly cows that don't fall pregnant.

Recipients are maintained on consistent, proven nutrition programs to support **strong pregnancy outcomes**.

**Our services save you and your staff time**. Recipient handling, monitoring, and preparation are managed entirely by us before implantation.

We offer **results driven pricing** – meaning **you're not paying for attempts, you're paying for outcomes**.

**LESS STRESS, WORK & COSTS**

**PREGNANCIES MADE EASY**

**RESULTS DRIVEN PRICING**

**IVF & MOET RECIPIENTS**

# DESIGNED FOR BREEDERS WHO WANT CONTROL

Our recipient supply service is designed for breeders who want early pregnancy confirmation, control over timing, and the ability to integrate embryos directly into their breeding program.

Once recipients are confirmed pregnant, they return to you – allowing you to manage calving, integration, and future program decisions on your terms.

## NEW TO ET PROGRAMS?

**ASK YOURSELF**

*Do you have the land and feed available to run recipients?*

*What will you do with recipient cows that don't fall pregnant to your embryos?*

*Are your recipients on the best possible nutrition to get the best possible results?*

*Are you in an area with favourable climatic conditions to run recipients?*

*Do you have the right people with the right experience to run successful ET programs?*

*What is the cost to you and your breeding program if you get a poor pregnancy rate?*
